Prioritized Focus Area #1				Prioritized Focus Area #2	Prioritized Focus Area #3
Essential Action	5.1 Objective-driven daily lesson plans with format	ive assessments.	5.3 Data-driven instruction.		

Desired Annual Outcome	 The scope and sequence, units, and interim assessments are all aligned to priority and supporting standards for all tested subject and grade areas, and grades PK-2nd mathematics and reading. Interim assessments aligned to state standards and the appropriate level of rigor are administered three to four times per year to determine if students learned what was taught. Time for corrective instruction is built into the scope and sequence. Curricular resources with key ideas, essential questions, and recommended materials, including content-rich texts, are used across classrooms. The school provides teachers with time at the beginning and throughout the year to internalize the curriculum and its resources. All teachers create and submit daily lesson plans that include clear objectives, opening activities, time allotments that indicate the amount of time spent on each step of the lesson, multiple, differentiated paths of instruction to a clearly defined curricular goal, and formative assessments along with exemplar responses. Campus instructional leaders review lesson plans frequently for alignment to the standards, the scope and sequence, and the expected level of rigor, and provide teachers with feedback and lesson planning support. 		 Three to five instructional strategies (e.g. monitoring aggressively, student-to-student discourse, strategic prompts), classroom procedures, and routines are introduced, modeled, and practiced with consistency and fidelity in all classrooms. Classroom instruction incorporates rigorous, high-quality experiences that promote critical-thinking skills. Teachers maximize instructional time through consistent, efficient, and visible structures (e.g., posted agendas, class opening, homework collection, withinclass transitions, and formative assessments). Campus instructional leaders conduct regular walk-throughs and observations to ensure consistent implementation of expectations. 						
Barriers to Address During the Year	Lack of understanding regarding knowledge of TEKs and implementation at the necessary level of rigor for success on state assessments. There is a need for development of effective systems for implementation and monitoring of lessons and TEKs implementation.		Lack of understanding regarding how to analyze data for data-driven instruction. Leadership needs to train in finding appropriate data and applying results to daily instruction in order to increase student outcomes. Monitoring of the system will be impetrative.						
Distri	ict Commitment Theory of Action		ble to establish strong data-driven instructional practices, meet the needs of all stu	he district ensures there are effective systems for identifying and supporting struggling udents through appropriate levels of rigor, and the instructional team will have the tools to					
Prioritized Focus Areas for Improvement			Capacity Builder						
5.1 Objective-driven daily lesson plans with formative assessments.	Daily lesson plans are required. The template includes: Topic; Time Frame; TEKs, ELPS, CCRS; Content/Language objective; Whole group (face to face); Special Pop accommodations; Instructional delivery; Online instruction; Materials/resources; ndependent/collaborative practice; Intervention. The sample plan was for one week and generalized. There was not a plan for reteach or assessment mentioned.								
5.3 Data-driven instruction.	Data analysis has not been systematic or ongoing on the campus as mentioned by the administrator and teacher groups. There is no evidence of systematic unpacking of standards and creation of exemplars, though some teachers report looking at data on their own. There is no specific, systematic procedure for planning and delivering the reteach, with specific plans in place. There was no evidence in hallways or classrooms of visible student progress artifacts.
